C. Local Agency Staffing	Section 1 and 2

STAFFING

The WIC Program is a part of the Office of Family Health under the auspices of the Division of Health and Medical Services, South Dakota Department of Health. The Division Director reports to the Secretary of the Department of Health. The staff available to perform State agency responsibilities and local program operations is indicated below. The organizational charts indicate staffing positions and supervisory structure. State Agency staff comes under the supervision of the Office of Family Health. State staff who delivers services for WIC comes under the supervision of the Office of Community Health Services including the oversight of contract agencies. Total FTE's available for each position and responsibilities of each position is identified below as applied against a 100% time study.

(1) WIC Program State Office

- a. Director: 1.0 FTE (Full-Time Equivalent)
Currently -- Rhonda Buntrock

Responsibilities: Overall Program management: including planning, policy development, organization, financial management, evaluation; allocation of funds to Local Agencies; monitoring Local Agencies for compliance; coordination with Community Health Services; technical assistance and training; supervision of specialists for Program Operations, Vendor/Data Management/Food Delivery, and Education/Outreach/Nutrition Specialist.

Qualifications: College degree in a health related/administration program with 5 year's managerial experience or equivalent combination of education and experience. To meet the requirements of Section 246.3 (e) (1) for a full time position some duties are performed by program specialists, in the area of management and compliance of regulations.

- b. Administration/Operations Program Specialist: 1.0 FTE
Currently -- Ardys Roseland

Responsibilities: Manages the administration component of program operations; develops Local Agency contracts; Policy development: keeps policy and procedure manual up-to-date; provide policy interpretation and technical assistance to Local Agencies; monitors the budgetary accounting and program expenditures; monitors program reporting; responsible for Civil Rights, American Disabilities Act, marketing & outreach component and member of management evaluation audit team.

Qualifications: Bachelors Degree in business administration or related field and two years managerial experience.

- c. MIS/Retailer Program Specialist: .1.0 FTE
Currently – Dawn Boyle effective August 9, 2006

Responsibilities: Manages the Vendor food delivery system: including retailer contracting, ICDS contact and enhancements, Policy development, training, monitoring and other related activities; provide direction and assist with direction for job duties of the Retail Coordinator.

Qualifications: Bachelors Degree in business administration or related field and two years managerial experience.

- d. Quality Assurance Program Specialist: 1.0 FTE
Currently – Patricia Burg

Responsibilities: Oversees and schedules the management evaluations of Local Agencies; participant survey, coordination with other agencies/programs, misuse for vendors, participants and local agencies. Monitors and reviews dual participation with ITO's.

Qualifications: Bachelors Degree in Food and Nutrition or in a health related program with 2 years managerial experience or equivalent combination of education and experience.

- e. Retail Coordinator: 1.0 FTE
Currently -- Renee Osterkamp

Responsibilities: Monitor compliance, train and educate authorized WIC retailers;
provide on-site visits to retailers; conduct compliance buys and education investigations; contract with retailers.

Qualifications: Graduation from high school with two years of retailer experience.

- f. Senior SecretaryAdministrative Assistant: 20 FTE
Currently – Stacy Rodman

Responsibilities: Monitors the computerized activities and assuring proper updating on the automated data processing system; investigates food package issuances; responsible for food instrument control and disposition; maintains client data and output reports; and compiles statistical data; arranges for/handles special formula delivery/disposition.

Qualifications: Graduation from high school with one year of data control experience.

- g. Office of Family Health Director: 14% Time Study .14 FTE
Currently – Kayla Tinker

(2) Public Health Nutrition

- a. Nutrition Consultant

Currently --Melissa Berg 1.0 FTE

Responsibilities: Overall development and evaluation of nutrition component including training and technical assistance to nutritionists and Local Agencies; nutrition policy and procedure development; development, selection and evaluation of nutrition educational resources; monitoring for compliance; nutrition coordinator.

Qualifications: BS Degree in Food and Nutrition with three years experience; MS food and Nutrition or Public Health Nutrition and two years' experience; or Registered Dietitian or eligible for registration with 2 years experience. Must be Licensed Nutritionist (LN). Duties are also performed by the Program Education/Outreach Nutrition Specialist, in the area of nutrition education resources and guidelines and technical assistance/consultation of Local Agencies and compliance of regulations.

b. Breastfeeding Coordinator

Currently – Stacey Skaff – 1.0 FTE

Responsibilities: Overall development and evaluation of breastfeeding component including training and technical assistance to nutritionists and Local Agencies; breastfeeding policy and procedure development, development, selection and evaluation of breastfeeding educational resources; promotion of breastfeeding and monitoring for compliance.

Qualifications: BS Degree in Food and Nutrition with three years experience in the area of breastfeeding education and promotion.

(3) Community Health Services

Regional Managers: 43.06% Time Study – FTE

Currently -- 8 Regional Managers

1 Office of Community Health Services Director

1 Administrator Assistant

1 Program Assistant

1 Survey Specialist

Responsibilities: Supervise Community Health Services staff (Nurses, Nutritionists and Clerical staff) in delivering WIC and implementation of the WIC Program activities; provide overall management in day-to-day operations of WIC; ensure compliance of program goals and federal guidelines.

Qualifications: Regional Managers - Bachelors Degree in Biology, nursing, nutrition, food sciences, dietetics, health services administration, or a related field and three years experience in disease intervention, public health nursing, nutrition dietetics, or public health administration.

The following time does not include leave general admin time by FTE

- b. Dietitians: **6.66 FTEs**
 Currently – Brenda Patzlaff
 Elizabeth Honerman
 Linda Michelson
 Kathleen Kovall
 Susan Alverson (½)
 Laura Clark (½)
- Kari Mitchell (1 FTE)**
 Wendy Locken
Lisa DeSmet (.6)
 Sara Braskamp
Shannon Kilichowski
 Jessica Timp

Responsibilities: Provide direct nutrition services: including nutrition counseling, nutrition education and diet interpretation to clients who demonstrate needs due to complicated nutritional conditions or to control medical conditions; provide nutrition education and medical assistance to WIC staff within respective region; coordinates WIC activities within region and Local Agency for compliance of federal regulations; supervises Local Agency staff when appropriate; market program locally.

Qualifications: Bachelor's Degree in Dietetics or Food Nutrition; and completion of an American Dietetic Association approved internship, coordinated program or an AP4 training program. Possession of or the ability to obtain registration with the American Dietetics Association as a Registered Dietitian within one year of employment. Must be licensed by South Dakota Board of Medical and Osteopathic Examiners.

- c. Nutrition Educators: **3.41 FTEs**
 Currently -- Lois Moose
 Kristine Ringstmeyer
- Lindsey Sailer
 Cheryl Schuh

Responsibilities: Provide direct nutrition services: including nutrition counseling, nutrition education and diet interpretation; provides nutrition education and technical assistance to WIC staff within respective region; coordinates WIC activities within region and Local Agency for compliance of federal regulations; supervises Local Agency staff when appropriate; market program locally.

Qualifications: Minimum of a Bachelor's Degree in Food Science, Nutrition or a related field.

- d. Nutrition Aides: **..92 FTE**
 Currently -- Ivalee Big Crow

Responsibilities: Perform individual assessments including: plan and prepare nutrition education boards, obtain health histories, determine nutritional risks, evaluate dietary intake and perform anthropometric and biochemical determinations as appropriate and prescribe food packages; provide nutrition counseling, nutrition education and diet interpretation.

Qualifications: Graduation from high school with two (2) years experience in related field to nutrition or dietetics.

e. Community Health Nurses: 28.33 FTE's

Responsibilities: Perform individual assessments including: obtain health histories, evaluate dietary intake, perform anthropometric and biochemical determinations, determine nutritional risks, evaluate dietary intake, prescribe food packages; develop nutrition counseling, nutrition education and diet interpretation; implement WIC policies and procedures; supervise local agency secretary; and market program locally.

Qualifications: Bachelor's or Associate Degree in Nursing or LPN Degree.

f. Support Staff: 33,61 FTEs

Responsibilities: Local Agency Secretary - Assist WIC applicants in determining eligibility; provide program information, complete and maintain participant forms; maintain accountability of food instruments; integrate nutrition education topics at voucher distribution; perform general office duties.

Supervisor/Nutritionist Secretary - Perform support services including: tabulating and recording data; composing and typing letters/forms/reports; maintaining files and nutrition education resources; ordering materials; scheduling meetings.

Qualifications: Graduation from high school with two (2) years clerical experience.

STAFFING RATIOS

BACKGROUND:

Staffing ratios were first developed in 1987 for WIC professional staff including nurse, nutritionist and clerical staff. The ratios were expanded to include a breakdown of activities by staff person by minutes of each component of client service and operating efficiency guidelines for local agencies to apply in developing clinic schedules, determine/adjust for no show rates and to become efficient in clinic operations.

The staffing ratios are used as guides for staffing levels, determining FTE's budgetary allotments, and management efficiencies. Supervisors monitor staffing levels on a regular basis to keep staff within the acceptable ranges.

The State develops a delineation of the type of staff to perform WIC functions and the responsibilities of each level.

REGIONAL OFFICE RECOGNITION:

South Dakota was recognized by the Denver Regional Financial Management Team in 2003 for "an exceptional job with the accuracy and timeliness of the FNS-798 and FNS-798A reporting requirements." South Dakota was also recognized by the Denver Regional Financial Management Team for "doing an outstanding job of continuous time study functions and monitoring the expenses and reimbursements of their local agencies and other related WIC costs. For FY2002, for Review efforts in establishing implementing staffing ratios" and for "our efficiencies, cost saving measures and improved quality...that included maximum utilization of staffing in relation to the delivery of services and staffing ratios".

ASSESSMENT:

In 1991, an assessment was done using FY90 Time study data to see how close we were meeting the WIC staffing ratios statewide. All programs were within an acceptable range, with adjustments made to accommodate for specific county FTE needs.

In the 1995 State WIC Plan, a goal/objective was to reassess what staffing level is sufficient at the Local WIC Agency by analyzing the current staff-to-participant ratios. To determine this, specific staff man hours were compared to the current staffing levels for each respective count and caseload. The conclusion was that the current allotted staff-to-participant ratio level was: again within acceptable range, sufficient to delivery WIC services and should remain unchanged at this time. However, we do want to reassess the nutritionist staffing ratios and develop new ones for a new classification of dietitian in the next year. The WIC policy will also be clarified to factor in range for travel and leave hours.

In 2003, the staff-to-participant ratio standards were reassessed in all areas including nutrition. The conclusion was that the current allotted staff-to participant ratio level was again within acceptable range, sufficient to deliver WIC services and should remain unchanged at this time. We did update the definition of Time Study codes to better reflect nutrition education training for all staff.

In 2004, we again reviewed the staff to participant ratio standards and have determined that we will need to either update to accurately reflect changes due to bimonthly issuance and computer enhancements or use the 100% time study information to have a more up to date reflection of time spent delivering WIC services. We are leaning toward discarding staffing ratios and only using time study information – potentially having to add some additional time code descriptions to determine staffing ratios.

STAFF-TO-PARTICIPANT RATIO STANDARDS:

Option 1:

Nutritionist	=	1/1050 @ 9.9 minutes per participant
Clerical	=	1/542 @ 19.2 minutes per participant
CPA	=	1/1677 @ 6.2 minutes per participant

Option 2:

Nutritionist	=	1/1465 @ 7.1 minutes per participant
Clerical	=	1/542 @ 19.2 minutes per participant
CPA	=	1/1156 @ 9.0 minutes per participant

Option 3:

Nutritionist/CPA	=	1/646 @ 16.1 minutes per participant
Clerical	=	1/542 @ 19.2 minutes per participant

Option 4:

Contract Nutritionist	=	1/1238 @ 8.4 minutes per participant
Contract Clerical	=	1/542 @ 19.2 minutes per participant
Contract Nursing	=	1/1677 @ 6.2 minutes per participant
DOH Local Agency	=	1/7429 @ 1.5 minutes per participant

PLAN FOR DELIVERY OF QUALITY NUTRITION SERVICES

BACKGROUND

With the development of Food and Nutrition Service and National Association of WIC Directors joint statement on quality nutrition services in the WIC Program, the recommendations to meet minimum staff qualifications as set forth in federal WIC Nutrition Standards and the difficulty in recruitment and retention of Registered Dietitians for WIC, a plan was formulated and implemented to establish levels of nutrition staff in the state. This became a joint effort in the Department of Health as nutrition staff, which also is WIC staff, began to see participants with increased complexity of needs such as children with special needs, metabolic disorders, and diabetes.

IMPLEMENTATION OF SYSTEMS

Two levels of staff were officially established:

Nutritionists - Range N14 (now called Nutrition Educators)

Qualifications: Bachelor's Degree in Nutrition, Food Science, or a related field.

Distinguished Function: Provide nutrition assessment, educational, and counseling services to high risk clients ensuring they receive information on proper nutrition.

Dietitian - Range T14 (now called Dietitians/Nutritionists)

Qualifications: Bachelor's Degree in Dietetics or Food and Nutrition and completion of an American Dietetic Association approved internship, coordinated program, or an AP4 training program. Possession of or ability to obtain registration with the American Dietetic Association as a Registered Dietitian within one year of employment. Must be licensed by South Dakota SD Board of Medical and Osteopathic Examiners.

Distinguished Function: Provide counseling services to clients who demonstrate nutritional needs due to complicated nutritional conditions or to control medical conditions.

A team approach is being used to provide nutrition services to clients to best utilize available nutrition staff. Either a Nutrition Educator or Dietitian is available to each Local WIC Agency for nutrition counseling. If a client is determined to be one that should be seen by a Dietitian, the Nutrition Educator refers the client to or consults with the Dietitian to assure appropriate counseling is provided. When a Dietitian is not available to directly counsel clients who demonstrate complicated nutritional conditions, they are consulted to assure appropriate counseling is provided. The team approach is proving itself and working well to meet the counseling needs of WIC clients.

Licensure of dietitians and nutritionists became effective in South Dakota July 1996. This law requires anyone who practices nutrition or dietetics to be licensed. The Nutrition Educators are covered by an exemption as long as they have consultation by a Dietitian/Nutritionist. The law has one title, Licensed Nutritionist (LN), which covered Registered Dietitians and Masters or Ph.D. prepared Nutritionists.

Currently, there are **twelve (13) Licensed Nutritionists** and **four (4)** Nutrition Educators on staff and available to provide services throughout the state of South Dakota.

Since January 1, 1997, all secondary nutrition counseling (now called Follow-Up Nutrition Counseling) is provided by nutrition staff to help meet quality standards.

Due to reorganization of Department of Health field staff in October 1996, the nutrition staff is now supervised by one of seven Regional Managers rather than one Nutrition Coordinator. Continuing education continues to be provided by the State Office staff via workshops, in-service education, print and audiovisual circulating packets, electronic mail, and other distance learning updates.

QUALITY ASSURANCE

All new Community Health Services (CHS) nutrition staff has been observed during counseling and/or certification by the State Nutritionist or Nutrition Consultant during the employee's probationary period. This has since reduced to two dietitians/nutritionists (Licensed Nutritionists). The State Nutritionist or Nutrition Consultant is annually observing the two Quality Assurance Nutritionists that complete all observations of community health services nutrition staff.

ALLIANCE PUBLIC HEALTH SERVICE DELIVERY

INTRODUCTION

The South Dakota Department of Health began assessing the role of the state's public health agency, with the intent of improving access to quality, affordable health care throughout the state. One goal of the department was to enhance local providers or to create new partnerships between the state and local providers, to avoid duplicate services where private providers were available. In an effort to deliver a more cost-effective package of public health nursing services to communities, the South Dakota Department of Health initiated pilot projects to test an alternative delivery system for traditional public health nursing services.

The ideal goal of the South Dakota Department of Health was to use contracts to create a three-way partnership between the service provider, the county commission, and the State Department of Health. Key components of the pilot project included: 1) contracting in selected counties for specified set of clinical preventive services by a private service provider, with representatives of the service provider, the county and the state signing a contract; 2) formation of a Community Health Council in each of the selected counties; and 3) focusing state public health nurses on population-based public health services for several counties rather than on more traditional activities such as providing clinical care to individuals.

BACKGROUND

Community Health Nursing Services have traditionally been provided throughout the state in most counties through joint arrangements between the County Commissioners and the Department of Health. It was within the unit of the Office of Community Health Services that WIC services were delivered throughout the state. Although the new arrangements were initially for nursing services, interests were sparked in the communities to deliver WIC services as well. Pilot projects desired to be a Local WIC Agency in the communities. Because arrangements needed to be made for delivery of WIC services due to shortage of state nurses to perform WIC certifications, the decision was made to begin allowing applications to be submitted to contract for WIC services in the same community with the private providers.

PROGRESS TO DATE

Currently there are eleven (11) Alliance Public Health Delivery Sites which include delivery of WIC services: Brule, Edmunds, Deuel, Douglas, Hand, Hutchinson, McPherson, Moody, Tripp, Turner, and Walworth Counties.

SERVICES PROVIDED IN THE PARTNERSHIP OF SERVICE DELIVERY

The local health care providers will be providing Maternal and Child Health Services, Family Planning, general health education and WIC direct client services. The State will continue to provide the training of local staff, technical assistance, quality assurance, and oversight of services provided. In addition, for WIC, the State continues the administration component which includes, but is not limited to: compliance with the fiscal and operational requirements prescribed by the federal regulations/guidelines/instructions; establishment of standards and criteria for program operations; staffing; certification, area served, income standards and nutrition risk standards; quality assurance; coordination and assessment; management of food delivery system; management of the nutrition education component, including development of the local agency nutrition education and marketing plan, in-service trainings and technical assistance, resource standards, development and management, and provision of staff designated to be the Regional Manager/Nurse Consultant.

FUTURE PLANS

The Department of Health will continue to work with the current counties to maintain Alliance Public Health Delivery Service Sites from local hospitals and county commissioners. The Department will have meetings with those requesting to discuss the concept and its potential for each respective service area. Services will continue to be provided by the Department of Health state staff in counties that are not an Alliance site. Where Nutrition staff are not available, Nutrition Services are provided by state staff at the Public Health Alliance sites.

UPDATE STATUS

The Office of Public Health Alliance has moved to the Office of Community Health Services where all service delivery is under the same administrator.

GOVERNOR'S AWARD FOR EMPLOYEE EXCELLENCE

1. The Shannon County WIC Staff, serving the Pine Ridge Indian Reservation, won the 1991 Governor's Award for Employee Excellence for Teamwork. The award was one of seven different awards given to state employees by Governor George Mickelson. Teamwork efforts have provided an opportunity for a unique tribal government working together on the reservation to improve health care for mothers and children. Accomplishments of the Team have been:
 - excellent rapport with Oglala Sioux Tribe and Indian Health Services Staff
 - outstanding effort in outreach, i.e., radio spots, news releases, group meetings, one-to-one marketing
 - sensitivity to cultural needs and increased utilization of services
 - service 10 1400 participants monthly, about 25% increase in one year
 - increased immunizations
 - improved health status of women, infants and children, i.e., higher birth weights, improved pregnancy outcomes, improved diets, earlier prenatal care, increased breastfeeding rates
 - increased referrals to other health care services
 - pioneered service delivery for the Department of Health, Division of Health Services, and WIC Program on the Pine Ridge Indian Reservation.

Through the efforts of the Team, residents of the Pine Ridge Indian Reservation have experienced an increase in the availability and accessibility of service with clinics at Pine Ridge, Kyle, Manderson, Porcupine, and Wanblee. Team efforts have been recognized by Indian Health Services and Tribal officials as a significant contribution to improved services on the reservation. The project serves as model for future reservation services in the state.

2. Staff involved in the statewide Infant Immunization Initiative, including the WIC Director, MCH Director, Field Operations Director, Medicaid Director, Communicable Disease Staff were nominated for the 1992 Governor's Award for Employee Excellence for Teamwork. Teamwork efforts concentrated on removal of barriers, which impede vaccine delivery, elimination of missed opportunities to vaccinate and educate, strategies to improve immunization coverage levels including collaboration with local health clinics and other service providers.

An Infant Immunization Initiative Plan (I-3) was developed for the entire state of South Dakota which includes collaboration and linkages with health care agencies/providers for implementing uniform immunization practices and present innovative actions toward achieving the goals of 90 percent immunization coverage levels for two year old children by the year 2000.

WIC has a major objective in the plan to improve availability of immunizations of children under the age of two who are WIC recipients.

LOCAL AGENCY IDENTIFICATION

GOAL: Identification of Local Agencies, clinic sites, and areas and populations served by the State Agency.

Priorities Served: Priorities I through VII are currently being served. If monies are not available, Priority VII's would be reduced first, then Priority VI's, and so forth.

South Dakota Local Agencies and Clinic Sites follow on attached pages.

South Dakota Local WIC Agencies and Clinic Sites

There are 63 Local Agencies and 87 clinic sites serving the WIC population in South Dakota.

<u>Clinic Code</u>	<u>Local Agency/Site</u>	<u>Telephone No.</u>
AUX	Aurora County WIC Program Courthouse, 401 N. Main PO Box 397 Plankinton, SD 57368	942-7163

AFFIRMATIVE ACTION PLAN

- GOAL 1. Identification of those areas and special populations within the State that contain eligible populations at greatest nutritional risk.
- GOAL 2. Determination of rankings of areas and special population groups to insure that those areas with greatest need receive priority for expansion of WIC services as funds become available.
- GOAL 3. Aid in determining potential caseload.

Counties were ranked according to the following factors for 2003-2005: 1) Premature birth weight, 2) Teen Birth Rate, 3) Infant mortality rate, 4) Neonatal mortality rate, 5) Per Capita income, and 6) Commodity Supplemental Food Program.

A ranking of the counties of the State according to need for WIC follows:

	1. Mellette	34. Grant
	2. Jackson	35. Walworth
XXXX	3. Shannon	36. Butte
	4. Buffalo	37. Deuel
	5. Corson	38. Lincoln
	6. Hand	39. Minnehaha
	7. Bon Homme	40. Fall River
	8. Hamlin	41. Yankton
	9. Potter	42. McCook
	10. Dewey	43. Lyman
	11. Perkins	44. Brown
	12. Todd	45. Spink
	13. Sanborn	46. Roberts
	14. Sully	47. Brookings
	15. Charles Mix	48. Gregory
	16. Aurora	49. Douglas
	17. Beadle	50. Stanley
	18. Custer	51. Campbell
	19. Ziebach	52. McPherson
	20. Turner	53. Clay
	21. Moody	54. Brule
	22. Bennet	55. Union
	23. Hughes	56. Edmunds
	24. Davison	57. Jerauld
	25. Kingsbury	58. Hanson
	26. Pennington	59. Lake
	27. Hutchinson	60. Hyde
	28. Meade	61. Miner
	29. Tripp	62. Jones
	30. Lawrence	63. Clark
	31. Day	64. Haakon
	32. Codington	65. Harding
	33. Marshall	66. Faulk

XXX CSFP Program

DISCUSSION OF THE AFFIRMATIVE ACTION PLAN

1. The WIC Program has been offered to all counties in the State. The expansion effort was directed to and Programs were implemented in those counties identified as most in need, the neediest one-third first. Each county now has a Program or is served by a neighboring county (three counties are served in this manner). In 1987 a WIC Program was started on the Pine Ridge Indian Reservation which made the state complete in serving WIC in SD in all counties. A unique arrangement was entered into through a joint agreement between the Oglala Sioux Tribe, Indian Health Service and the Department of Health, WIC Program whereby all parties have a role in providing WIC to the reservation. Other clinics throughout the state have similar arrangements.

All counties are currently serving priorities I through VI. Priorities may be limited throughout the year based on funding. Further outreach efforts will be directed to reach those individuals in all counties most at risk, specifically pregnant women and infants.

A marketing plan has been developed for marketing the Program and increasing clients' awareness of the Program (e.g., local newspapers free to the public radio announcements and/or public service announcements). This is described under Program Availability. A needs assessment may be done to identify more than one agency in counties specifically where distances to travel to the Local Agency is a hindrance to several clients.

Efforts to increase technical assistance in implementing the Program will be: 1) continue increasing our knowledge of Indian culture to afford our nutrition education to the Indian people of South Dakota by contacting other state's native representatives regarding what works best for Indian people; 2) continue obtaining outreach materials and written educational materials and audio visuals for non-English speaking clients as needed; and 3) conduct on-site visits and training as necessary.

2. Since WIC has been implemented statewide, operations will be expanded in the neediest one-third to one-half of the state according to the following:

Local Agencies with a minimum caseload of 100 in the top one-third to one-half of the Affirmative Action Plan will be assessed for expansion of outlying clinic sites, according to the potential eligible not being served and distance to travel/proximity of participants to the clinic site.

Documentation will be kept as to the reason an area of lower priority was chosen.

3. The CSFP Program at Pine Ridge serves approximately 1,600 participants monthly in Shannon County. According to potential caseload figures, this indicates potentially eligible persons in this area are being served by the CSFP program.
4. Migrant farm workers are reached through the Migrant Council and Migrant Health Service in the areas where they are employed. Spanish language informational materials are supplied as well as a contact person at the nearest Local Agency and the phone number of that agency. Due to the very limited use of Migrant farm labor in this State, the impact is minimal. Figures for migrant participation are based on previous year's participation.
5. The Native American population is served in nearly all of our Local Agencies. Clinics are held in many locations specifically to serve this population. In each county that serves a specific tribe, a tribal contact person was involved in determining clinic locations, voucher pick-up sites and on-going program operations. Tribal officials have indicated that although Lakota is the spoken language, English is the written language. Therefore, outreach materials are printed in English.

These materials and additional information on the Program is periodically provided to all agencies working with the Native American population. Spanish educational materials are also made available to clients as needed. Oral communication is sometimes necessary at clinics due to the reading levels of participants.

In an effort to make WIC clinics more accessible to Native Americans on the Pine Ridge Indian Reservations, satellite clinics have started up in four outlying areas within the reservation. Transportation to the clinics has been identified as the largest factor inhibiting getting to the WIC clinics.

In September 2000, Pine Ridge WIC staff began delivering WIC services from a mobile camper. The camper was to be used to deliver services in Porcupine, Manderson and Oglala. The camper was donated to the State Health Department by the Federal Emergency Management Agency (FEMA), which used it during the response to the 1999 tornado in Oglala. A remodeling converted the camper into a mobile WIC office complete with computer hook ups, scales, and a small room for private counseling with clients. In 2005, infrastructure monies were received for a permanent site at Porcupine due to the mobile camper wearing out.

With the Healthy Start initiative, efforts were towards collaboration on the local and state level in making WIC services more accessible to the Native Americans and to identify and alleviate barriers to receiving services.

Attempts are also made for one-stop shopping to make health services more accessible. WIC clinics are often scheduled in conjunction with IHS or well-baby, prenatal, immunization clinics and physician services. In addition, WIC can certify mothers and infants during their stay at the IHS hospital of the reservations.

6. Homeless persons are served in the Local Agencies according to WIC Policy and Procedural Manual. This population is reached through contacts and distribution with food pantries, homeless centers, unemployment offices and so forth. No person is denied services based upon their temporary shelter. If no residency address is given, general delivery is assumed for the post office address.
7. Refer to Section 246.5 WIC Regulations and WIC State Plan Guidance, page 14 for meeting the Affirmative Action Plan.
8. Selection of Local Agencies - The State Agency shall consider the following priority system which is based on the relative availability of health and administrative services, in the selection of local agencies:
 - a. First consideration shall be given to a public or a private nonprofit health agency that will provide ongoing, routine pediatric and obstetric care and administrative services.
 - b. Second consideration shall be given to a public or a private nonprofit health or human service agency that will enter into a written agreement with other agency for either ongoing or routine pediatric and obstetric care or administrative services.
 - c. Third consideration shall be given to a public or private nonprofit health agency that will enter into a written agreement with private physicians, licensed by the State, in order to provide ongoing, routine pediatric and obstetric care to a specific category of participants (women, infants, or children).

- d. Fourth consideration shall be given to a public or private nonprofit human service agency that will enter into a written agreement with private physicians, licensed by the State, to provide ongoing, routine pediatric and obstetric care.
- e. Fifth consideration shall be given to a public or private nonprofit health or human service agency that will provide ongoing, routine pediatric and obstetric care through referral to a health provider.
